From the Editor's desk

Greetings from NGSMIPS,

Let me take this opportunity to thank all the staff members of the college for their support and active participation in the process of accreditation of undergraduate program by National Board of Accreditation on 10th and 11th of November 2018.

The process of accreditation, auditing, assessment etc. by the external agencies give valuable inputs, identify the gaps, help in streamlining documentation and gives a general sense of accomplishment. Apart from improving the standing of the institution, the NBA accreditation facilitates getting grants for academic activities.

The expert committee suggested that the institute should improve its performance in research and consultancy, faculty participation, library infrastructure and placement and training. Let us draw an action plan

to bridge the gaps identified in a time bound manner. The ideal way is to prepare a vision plan for the next 5-10 years which we shall do in the next couple of weeks.

However, the basic task remains unchanged. The primary responsibility is to make the institution a preferred destination for the students who wish to pursue pharmacy profession by improving the standards, excellent teaching-learning environment creation and robust placement activities. These three areas decide the admission to the college thereby the feasibility.

I wish all the readers of NGSM Herald a wonderful, prosperous 2019.

Regards
